To Whom It May Concern

I am writing to highly recommend Oscar Stommendal, who worked as an intern in our department for nearly a year. Oscar initially joined us as a summer intern last year and, due to his very good performance, chose to extend his internship, much to our delight.

During his time with us, Oscar has consistently demonstrated a high level of curiosity, intelligence, and professionalism. He has always been willing to help and does so with a positive attitude and a smile on his face. His help have been important, particularly in the area of task automation through scripting, primarily using Python.

Oscar has developed several scripts that have improved our efficiency. Some examples include scripts for automating data processing and analysis, as well as scripts for the automatic formatting of mechanical load data for strength analysis. His work has helped us streamline some of our processes.

Based on what I have seen, I am confident that Oscar has the potential to excel as an engineer or researcher, both of which he has expressed interest in pursuing. His technical skills, combined with his dedication and positive attitude, make him an excellent candidate for any position he chooses to pursue.

I wholeheartedly recommend Oscar Stommendal and am confident that he will be a valuable asset to any team. Please feel free to contact me if you require any further information.
