| <b>Exchange Ambassador @ Chalmers University of Technology</b>                                                                                                                                                                                                                                              | Sep 2025 - Today    |
| – Inspired students to study abroad by sharing my experiences, insights, and organizing events.                                                                                                                                                                                                             |                     |
| <b>Summer Internship within Emerging Compute @ Ericsson<sup>i</sup></b>                                                                                                                                                                                                                                     | Jun 2025 - Aug 2025 |
| – Investigated the potential of quantum computing to solve problems in telecom.<br>– Contributed to cutting-edge research, R&D strategy discussions, and worked in cross-functional teams, using Excel and PowerPoint to present findings.                                                                  |                     |
| <b>Research Technician @ GKN Aerospace<sup>i</sup></b>                                                                                                                                                                                                                                                      | Sep 2023 - May 2024 |
| – Optimized MATLAB and Python tools, improving processing time and engineering decision-making.<br>– Developed a Python package to automate QA, cutting preparation time and improving consistency.<br>– Coordinated with engineers and project managers to align tool improvements with operational needs. |                     |
| <b>Summer Internship in the GTC-department @ GKN Aerospace<sup>i</sup></b>                                                                                                                                                                                                                                  | Jun 2023 - Aug 2023 |
| – Automated data analysis and developed a tool for stress calculations on CAD models using Python.<br>– Reduced the time spent on data analysis, improving the department’s overall efficiency.                                                                                                             |                     |
| <b>Part-time Consultant @ Nordisk rörmärkning AB<sup>i</sup></b>                                                                                                                                                                                                                                            | Apr 2021 - Nov 2023 |
| – Designed Excel/VBA tools to automate and simplify customer orders, minimizing efforts and errors.                                                                                                                                                                                                         |                     |
